

New stainless steel handle range for front operated disconnect switches

ABB is the exclusive provider of the new 316L stainless steel handle range for disconnect switches. This handle range is ideal for industries requiring exceptional corrosion resistance, superior strength and outstanding tolerance of extreme conditions.

The new pistol type handles are available in lengths from 45 to 275 mm for shaft diameters 5, 6 and 12 mm. They are padlockable with three padlocks in the OFF-position and the door is interlockable in the ON-position.

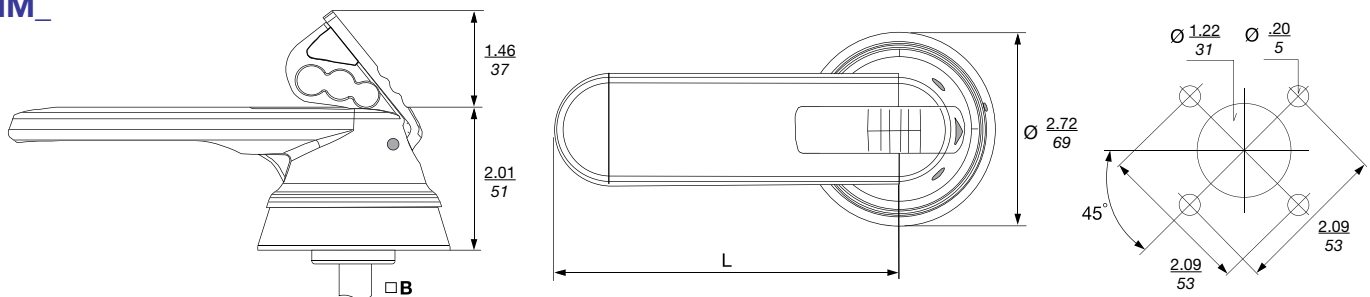

Stainless steel pistol grip handles for disconnect switches

Protection class NEMA 1, 3R, 4, 4X, 12/IP66

Color	Handle length [in/mm]	Catalog number	Weight/unit [lbs]	List price
