MODEL 13 SWITCHGEAR COUNTER

Switchgears provide centralized control, protection, and monitoring of low to medium voltage power equipment and circuits. Each time the power is disconnected by the tripping of the main switchgear, the Redington Model 13 Stroke Counter records the count to track the cycles and/or life of the unit.

When the unit attains a preselected number of cycles, the switchgear is serviced or replaced.

REDINGTON

Counters, Hour Meters, Indicators, Controllers.
