

### The 601CS-D-PI

3-phase Power Monitor is a fully programmable electronic power monitor designed to monitor 3-phase systems. The 601-CS-D-PI has a single relay that can be configured as a general purpose network output or to trip on ground faults. The 601-CS-D-PI monitors ground fault current, phase currents, phase voltages, power factor and frequency. The RS485MS-2W communications module allows the 601-CS-D-PI to communicate using the Modbus RTU protocol. The Modbus connection can be used to monitor power parameters, setup the device or control the fault relay. A DeviceNet Communications I/O module (CIO-601CS-DN-PI) is available as well. This CIO module only works with the 601-CS-D-PI unit. It is used for sending the information from the 601-CS-D-PI over a Devicenet network. It also provides I/O capabilities and the ability to set the parameters of the 601-CS-D-PI.

\*\*Note: This product must be used with a Zero Sequence CT for proper operation (not included).

### Enclosure

Metal NEMA-3R electrical box (6" x 6" x 4") with lenses

Part Number: NEMA-3R-L

### Electronic Megohmmeter

The Model M-500 is an automatic, portable, battery-powered insulation tester. This unit is specifically designed as an inexpensive alternative to costly swing needle megohmmeters. The M-500 measures insulation resistance values of motors, generators and transformers up to 1000 megohms at 500VAC, indicating the condition of insulation on the zone scale. Its compact design and ease of use makes the M-500 a great diagnostic tool for motor rewind shops, electrical maintenance personnel and pump installers.

Part Number: M-500

## Auxiliary Products

enhancements/accessories for multiple SymCom products

### Informer IR Kit

can be used with the MotorSaver<sup>®</sup> Model 455 and PumpSaver<sup>®</sup> Models 111-Insider-P and 231-Insider-P. It simply attaches to the face of the unit to provide remote diagnostics without opening the panel.

Part Number: IR Kit-12 (12" long)  
IR Kit-36 (36" long)

### The OL-RESET

allows the 777 line of MotorSaver<sup>®</sup> and PumpSaver<sup>®</sup> products to be manually reset without opening the panel door. Simply connect the module to the 777 communication port, connect a wire to each of the two applicable pins on the OL-RESET and to a normally-open push-button switch (sold separately). Mount the push-button switch in a convenient location.

Part Number: OL-RESET

### 777 Manual Remote Reset Kit (24" long)

allows the 777 line of MotorSaver<sup>®</sup> and PumpSaver<sup>®</sup> products to be manually reset without opening the panel door. Simply connect the 9-pin adapter to the 777 communication port and mount the reset switch in a convenient location.

Part Number: 777-MRSW

OT08-PC

RB08-PC

### Octal Sockets

for 8-pin plug-in units.

Part Numbers: OT08-PC (surface & DIN rail mountable)  
RB08-PC (surface mountable)
