

## Features:

- Fully customizable, flexible and complete user interface
- Supports Modbus/TCP Gateways
- Ability to monitor and configure up to 99 Modbus/RTU or Modbus/TCP connected units
- Advanced data logging and graphing features
- Easy to use automatic device detection feature
- Ability to setup, configure, and save a network for fast node commissioning
- Seamless remote monitor integration
- Continuous fault and event monitoring
- Advanced setpoint and real-time parameter features including:
  - Valid ranges of setpoints
  - Detailed parameter descriptions
  - Enumerated bits/drop down lists for setpoints
  - Enumerated bits for real-time values
  - Ability to print setpoints
- Extensible for future products/product upgrades
- Lock setpoints to prevent tampering

The Solutions-M software provides a way to configure many products in the 777 family of overload relays and power monitors, and with activation can be used to configure most SymCom 777, 77C and 601 Series units.

The Solutions-M software allows you to log data from the family of 777 relays or through various display modules, such as the RM-2000, into a file on a PC for later analysis. The Solutions-M software can be used to monitor and control the family of 777 overload relays over a network.

SymCom's Solutions Software features include data logging, real-time data monitoring and fault and event monitoring. Devices can be added and configured manually or the software can scan an existing network to identify devices which can be used as is or reconfigured by the user. Setpoints for each device can be uploaded and downloaded for easy monitoring and reconfiguration. Solutions-M supports both RS-485 and TCP/IP networks.

## Specifications

---

Functional Characteristics
<b>Requirements</b> Windows XP or later RS-232 Port or USB Port with RS-485 converter for Modbus/RTU Ethernet port for Modbus/TCP Microsoft .net Framework (included) 300 MB Hard Drive Space USB Port
<b>General Characteristics</b>
<b>Recommendations</b> Internet access (for updated models) Display with 1024x768 resolution capacity or higher 1.0 GHz processor with 128 MB RAM 500 MB Hard Drive Space
